

Perfect Voice Quality

Understand your customers clearly in High Definition Audio

HD Voice also known as **wideband audio** covers a much broader audio spectrum compared to legacy analog telephones allowing you to recognize voices and distinguish persons much easier. **Crystal clear conversations** with a very natural feel require less listening effort and result in increased productivity.

Narrowband vs. Wideband Audio

Active noise cancellation for productive conversations

Active noise cancellation prevents the other party from hearing background noise like co-workers talking or a humming air-condition. As a result the other party will **hear you more clearly** and stress levels in conversations go down. Your workforce will become more relaxed as they don't need to repeat words or sentences and your customers will perceive your company in a professional manner.

Versatility Connectivity

Why QD plugs & what are they good for?

Professional Headsets come in two parts. The first part is the Headset with a **Quick Disconnect plug (QD)** on the end of the cable. The second part is the connection cord with a QD plug on one end and an audio connector on the other end. **This results in the following advantages:**

- For hygienic reasons every teleworker should have their own personal Headset.
- When leaving their workstation or if multiple agents are working in shifts on the same desk, employees can store their headset in their locker.
- Your company does not need to purchase connection cords for every headset merely for every workstation resulting in lower costs.
- People are more careful with items they are responsible for resulting in longer life spans of individual headsets.

Compatible with your existing Headsets

Xenexx connection cords and headsets come with a choice of Plantronics and Jabra Quick Disconnect (QD) plugs allowing you to utilize your existing equipment.

Compatible with all major IP Phones

Great Price

How headsets increase your productivity

By handing out headsets to your employees you can **raise their productivity by up to 10%** as you enable them to multitask while on a phone call. Multitasking also leads to fewer mistakes as people can take notes while still on the call, shortening the wrap up time after a call significantly.

A true flagship headset...

Xenexx Headsets and connection cords are comparable in quality with high end devices from other manufactures

...with an entry level price tag

Similar products from other manufactures cost 30 – 50% more.

One Headset, Multiple Devices

How do I choose the right Headset for my needs?

When deciding on a Headset you can choose between one and two earpieces devices. Depending on the needs you want to consider the following points:

Why choose monaural headsets:

- Raise productivity by allowing office workers to search information while one the phone with a customer
- Easily consult with co-workers while talking with a client on the phone
- You are talking less than 1 hour on the phone on daily basis

Recommend for: Office environments

Why choose binaural headsets:

- Focus fully on your customers' needs without getting distracted by co-workers in the room
- Don't suffer from unbalanced hearing and reduce stress levels
- You are talking more than 1 hour on the phone on daily basis

Recommended for: Call Center & Office environments
