Xenexx Supervisory cord with mute switch

The supervisory cord is ideal for training call center agents. A built-in mute switch allows the supervisor to listen into calls silently or to join a conversation at any time.

The Xenexx supervisory cord with mute switch has been designed for use with corded Jabra, Plantronics or Xenexx Headsets. It is available with either Jabra or Plantronics QD (Quick Disconnect). Three QD plugs allow connecting two headsets with any IP Phone or Computer via a wide variety of Xenexx connection cords.

The cord has a length of 1.3m and is made from TPE reinforced Kevlar[®] for maximum strength. Xenexx cords have been tested to withstand 20,000 cycles in bend and strain tests to guarantee highest quality.

This cord is compatible with:

- all corded Jabra, Plantronics and Xenexx Headsets
- all Xenexx connection cords (RJ9, 2.5mm, 3.5mm, USB)
