

### **Xenexx Training Box S33**

*The Xenexx Training Box S33 is designed to connect two headsets via RJ9 plug for training/supervisory purposes to one telephone. Each headset can be muted individually via built-in mute button while the volume control on the side allows volume adjustment for the connected headsets. A built-in 3.5mm connector lets you connect a recording device for later analysis and rehearsal of conversations.*

*The built-in slide switch on the right side of the Training Box allows you to connect almost any telephone. The two RJ9 ports on the back allow connecting headsets from any manufacturer.*

*The Training Box is compatible with: any Headset with RJ9 plug, any Telephone via built-in slide switch, any recording device via built-in 3.5mm Jack*

---
