Xenexx XS 820 Monoaural Wideband Audio Headset

The Xenexx XS 820 Monoaural Headset is designed for office use allowing increased productivity while on a phone call. Office workers can look up customer information or make hands free research on the computer while still being able to follow conversations in the office.

Let customers understand you clearly with the built-in ultra-noise cancelling microphone that cuts out unwanted background noise and is ideal in noisy office surroundings. Wideband audio earphones allow you to enjoy lifelike conversations while the built-in SpikeWatch[®] protects your ears from extreme sound spikes. The super soft leather ear cushion and the adjustable headband ensure very comfortable wear making the Xenexx XS 820 an excellent choice for every office worker.

Xenexx headsets come with a Quick Disconnect cord made from TPE reinforced Kevlar[®] and are available with either a Plantronics or Jabra QD (Quick Disconnect). The QD plug allows connecting your headset via a huge variety of connection cords to the device of your choice.
