Xenexx XS 825 Binaural Wideband Audio Headset

The Xenexx XS 825 binaural Headset is designed for call center agents and busy professionals that spend many hours on the phone every day. Dual earpiece headsets offer a more balanced hearing experience and allow teleworkers to focus fully on their customers' needs without getting distracted by co-workers.

Let customers understand you clearly with the built-in ultra-noise cancelling microphone that cuts out background noise and is ideal in noisy call center and office surroundings. Wideband audio earphones allow you to enjoy lifelike conversations while the built-in SpikeWatch[®] protects your ears from extreme sound spikes. Super soft leather ear cushions and the adjustable headband ensure very comfortable wear making the Xenexx XS 825 an excellent choice for every teleworker.

Xenexx headsets come with a Quick Disconnect cord made from TPE reinforced Kevlar[®] and are available with either a Plantronics or Jabra QD (Quick Disconnect). The QD plug allows connecting your headset via a huge variety of connection cords to the device of your choice.
